

THE FABRICATOR

Q3 2025 Issue

NSS Team,

We are excited to introduce the very first edition of North State Steel's Quarterly Newsletter called "The Fabricator!" Each quarter, we will take a moment to look back at company highlights, project milestones, and team achievements from across NSS.

Thank you all for your hard work and dedication as none of this success would be possible without you!

NORTH STATE STEEL

100% EMPLOYEE OWNED

Prodevco Robot — It's Live!

This summer was full of milestones, one of the biggest being the installation of our PCR42 robotic plasma steel cutting system. A huge thank-you goes out to the North State team members who put in the time and effort to get the machine up and running. Since then, the PCR42 has already processed tons of steel across multiple projects, helping streamline our work and improve efficiency in the shop. We're excited to see how this investment continues to support our projects and people moving forward.

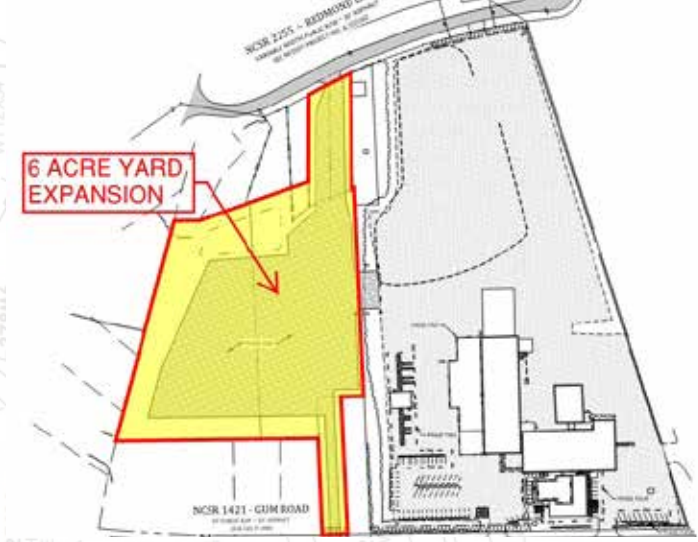

Office Addition — Topping Out & Progress

Another huge milestone for us this summer was the groundbreaking and progress on our office expansion. It's exciting to see the steel going up on a project that will directly support our growth and give our team the space we need moving forward. A big shout out to everyone in the shop who fabricated the steel for this addition — your hard work is literally building the future of North State Steel. We can't wait to move into the expanded space next year!

Yard Expansion

North State Steel completed a 6-acre yard expansion for additional material storage and laydown in the summer of 2025. This expansion was long overdue based on the volume of work we've been processing over the last few years, so it's a welcome sight to see it finally completed! This area will primarily be used for North State Steel inventory.

New Hires — Welcome!

Please join us in welcoming our new teammates who joined this quarter.
